PROFESSIONAL SUMMARY

IT graduate and full-stack developer with hands-on experience building production web applications using React, Django, Python, and PostgreSQL. Shipped five internal tools during a library systems internship, including a Digital Thesis Repository that cut search time from minutes to seconds and a migration of 2,000+ theses with full data accuracy. Comfortable working across technical and non-technical teams, from requirements gathering through delivery.

SKILLS

Programming: Python, JavaScript, Java, C++, SQL

Web Development: React, Django, Next.js, HTML, CSS, Tailwind CSS

Databases: PostgreSQL, MySQL

Data & Analytics: Microsoft Excel, Power BI, SQL, Data Preprocessing

AI/ML: NLP, Hugging Face Transformers, LLM Applications, Prompt Engineering

Tools & Practices: Git, GitHub, VS Code, System Analysis, Software Testing, Debugging, Deployment

EXPERIENCE

IT Intern / Junior Developer — BSU Library Services Office

2026

- Built a web-based Digital Thesis Repository with intelligent search and automated metadata extraction, cutting average search time from 2–3 minutes to 5–10 seconds.
- Designed and shipped 5 internal tools — AI-assisted repository, Seat Reservation System, PDF Compressor, Word-to-PDF Converter, and Time In & Out System — streamlining daily library operations end to end.
- Led digitization and migration of 2,000+ theses into the new system, preserving data accuracy and integrity throughout the transition.
- Optimized backend queries and access controls, improving document search speed and strengthening system security and reliability.
- Partnered directly with library staff to gather requirements and run user testing, translating operational needs into working software features.
- Produced SQL- and Excel-based reports and dashboards that informed operational decision-making for library management.

PROJECTS

Library-Based Digital Thesis Repository

React, Django, PostgreSQL, Hugging Face Transformers, Elasticsearch

- Built an AI-assisted document repository with automated metadata extraction and tagging, analytics dashboards, and role-based access control.
- Optimized database queries and indexing to speed up document retrieval and improve overall system responsiveness.

EDUCATION

Bachelor of Science in Information Technology, Major in Business Analytics

Batangas State University TNEU — Lipa Campus | Graduated 2026
